NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

1 BASIS OF PREPARATION

The interim condensed consolidated financial information for the six months ended 30 September 2025 has been prepared in accordance with International Accounting Standards (“IAS”) 34 *Interim Financial Reporting*. The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual consolidated financial statements for the year ended 31 March 2025.

2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group’s annual consolidated financial statements for the year ended 31 March 2025, except for the adoption of the following amended IFRS Accounting Standard for the first time for the current period’s financial information:

Amendments to IAS 21 *Lack of Exchangeability*

The nature and impact of the amended IFRS Accounting Standard are described below:

Amendments to IAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. As the currencies that the Group had transacted with and the functional currencies of group entities for translation into the Group’s presentation currency were exchangeable, the amendments did not have any impact on the interim condensed consolidated financial information.

3. OPERATING SEGMENT INFORMATION

The Group’s operating and reportable segments, based on information reported to the Company’s executive directors, being the chief operating decision makers of the Group, in respect of the Group’s performance regarding different products and different markets, are as follows:

Sofas and ancillary products	–	manufacture and distribution of sofas and ancillary products through wholesale and distributors other than those by Home Group Ltd and its subsidiaries (“ Home Group ”)
Bedding and ancillary products	–	manufacture and distribution of bedding and ancillary products
Home Group business	–	manufacture and distribution of sofas and ancillary products by Home Group
Other products	–	manufacture and distribution of chairs and other products to commercial clients, smart furniture spare parts and metal frame for recliners, income from sales of scrap metal etc.
Other business	–	sales of residential properties, hotel operation, furniture mall business and lease of properties

The sofas and ancillary products segment includes a number of sales operation in various locations, each of which is considered as a separate operating segment by the executive directors. For segment reporting, these individual operating segments have been aggregated into a single reportable segment in order to present a more systematic and structured segment information on the performance of different type of products.

The Company's executive directors make decisions based on the operating results of each segment and review reports on the aging analysis of trade receivables and bills receivable and expected usage of inventories of the Group as a whole. No information of segment assets and liabilities is reviewed by the Company's executive directors for the assessment of performance of operating segments. Therefore, only the segment revenue and segment results are presented.

The accounting policies of the operating segments are the same as the Group's accounting policies. Segment results represent the profit before income tax earned by each segment without allocation of other income, share of profits/(losses) of a joint venture, net exchange gains/(losses), finance costs, fair value losses on investment properties, fair value gains/(losses) of financial assets at fair value through profit or loss, provision for impairment of intangible assets and unallocated expenses.

MANAGEMENT DISCUSSION AND ANALYSIS

MARKET REVIEW AND BUSINESS REVIEW

During the Review Period, the global economic environment continued to face various challenges such as growth pressure, geopolitical risks and rising trade protectionism, causing pressure across the sectors. Nonetheless, leveraging its flexible operation strategy and sound financial management, the Group achieved robust performance in both domestic and overseas markets. During the Review Period, the Group recorded a revenue of approximately HK\$8,044,781,000, representing a year-on-year decrease of approximately 3.1%. However, benefitting from its stringent cost control and excellent operation efficiency, the gross profit margin increased by 0.9 percentage point year-on-year to 40.4%, and the net profit margin also increased by 0.5 percentage point to 14.2%, which reached the leading level in the industry. Despite the slight decrease in revenue, the profit attributable to equity owners of the Company recorded a modest increase of 0.6% year-on-year to approximately HK\$1,145,578,000, realizing a steady and positive development momentum which highlighted the outstanding operation capability of the management.

PRC market

While the PRC macro-economic environment continued to face various challenges such as the slow pace of recovery in the consumer market, the domestic sales business of the Group has shown noticeable improvement, with the decrease in sales revenue substantially narrowed as compared to the corresponding period of last year. The management holds the opinion that the sofa retail market in China may have bottomed out. The Group will continue to optimize its product mix to improve cost-performance ratio, and will strengthen collaboration with the distributors. Meanwhile, the management optimized store strategy to facilitate refined store operation management, in an effort to improve sales performance.

In addition, as the management perceives there is still room for improvement in the online retail market, we are devoting more resources to online sales platforms and expanding e-commerce channels and social media promotion, so as to improve brand exposure and sale conversion efficiency and further solidify our competitive edge in the PRC market. In doing so, we have achieved a breakthrough in online sales, thus offsetting the negative impact of a sluggish retail market on some offline stores.

During the Review Period, the sofa sales volume of the Group in the PRC market remained the same, with a slight decrease in the average sales price, which was mainly attributable to the increase of online sales as a percentage of sales volume. In the first half of the financial year, revenue from the PRC market decreased by 6% year-on-year to approximately HK\$4,674,936,000 (excluding revenue from real estate, shopping mall property and other business), representing an improvement over that of the previous half year, which was attributable to increasing investments to facilitate online sales and strengthen promotion campaigns. During the Review Period, the Group adjusted its store layout strategy, in an effort to increase customer traffic, turnover rate and sales revenue of its stores. As of 30 September 2025, the total number of stores for sales of the Group's products amounted to 7,040 (excluding Style (格調) and Suning (蘇寧) stores), representing a net decrease of 327 stores as compared to 31 March 2025.

Overseas markets

The Group has been committed to research, development and innovation, especially for overseas markets with the United States as the primary market, and has launched additional variety of products and functions, receiving high recognition from our customers. During the Review Period, although the overall industry was faced with higher international trade barrier and uncertainties brought by frequent changes in the U.S. tariff policy, the overseas business of the Group continued to demonstrate strong resilience, highlighting the strong competitive strength of the Group's products in the global market. During the Review Period, revenue from the North America market amounted to approximately HK\$2,160,622,000, representing a slight year-on-year increase of 0.3%; revenue from the European and other overseas markets amounted to approximately HK\$764,520,000, representing a year-on-year increase of approximately 4.3%; and revenue from Home Group also increased by 2.2% to approximately HK\$379,665,000. The Group continued to optimize supply chain layout, and established manufacturing bases in various regions across the globe, which helped to mitigate the impact of differentiated tariff policy and improve product competitiveness and delivery capacity, so as to consolidate its global market share.

In addition, the reintroduction of interest rate cuts by the U.S. Federal Reserve has brought positive impact to the local retail market. The Group will continue to participate in large-scale exhibition events around the world and strengthen close connection with each customer, so as to master an understanding of changes in local demands.
